

Navigating Risk and Compliance Artificial Intelligence

AI Regulatory

Laws and regulations governing AI systems and operators

Data Privacy

Automated decision-making, profiling, and privacy rights

Cybersecurity

Threats, vulnerabilities, and risks to system availability and integrity

Intellectual Property

3rd party IP rights, training data, web scraping, and AI outputs

AI Contracts

Disclaimers, indemnities, audits, SLAs, and limits of liability

Unlawful Biases

Biases in training data, labeling, design, and application

Negligence

Low confidence intervals, error rates, and hallucinations

Our playbook covers every aspect of AI risk and compliance, from emerging regulations to AI TEVV best practices.
